Supplement of

Ocean phosphorus inventory: large uncertainties in future projections on millennial timescales and their consequences for ocean deoxygenation

Tronje P. Kemena et al.

Supplement:

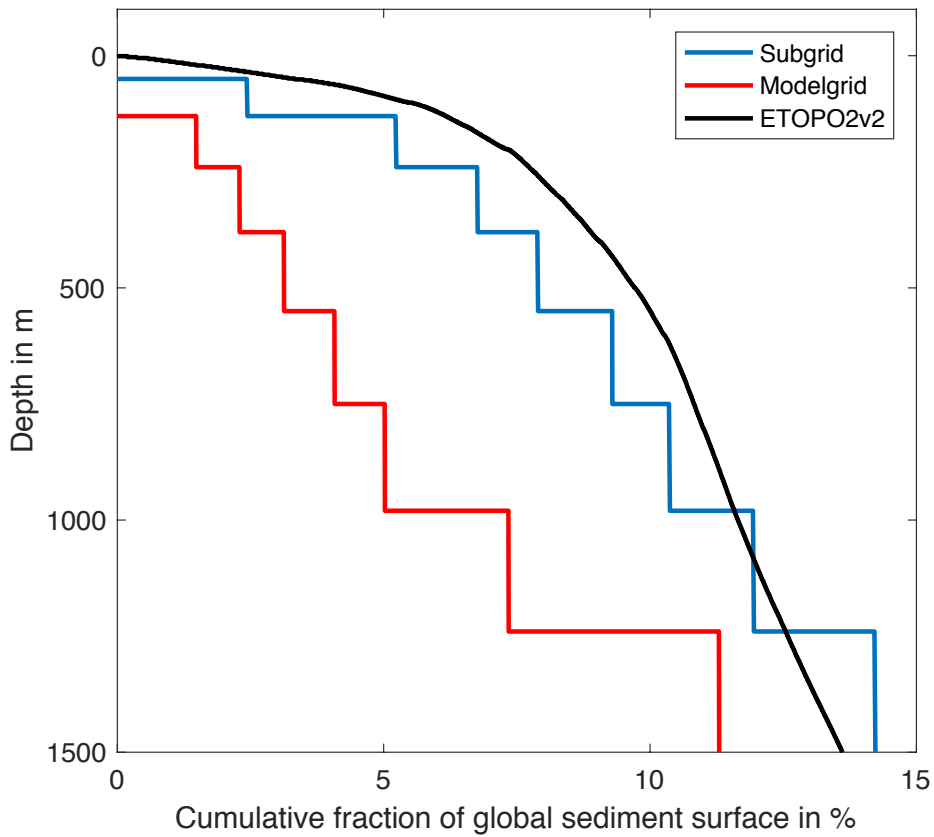

Fig. S1: Hypsometry for the upper ocean for the model bathymetry (blue and red lines) versus observations (black line) from ETOPO2v2 (National Geophysical Data Center, 2006).

5

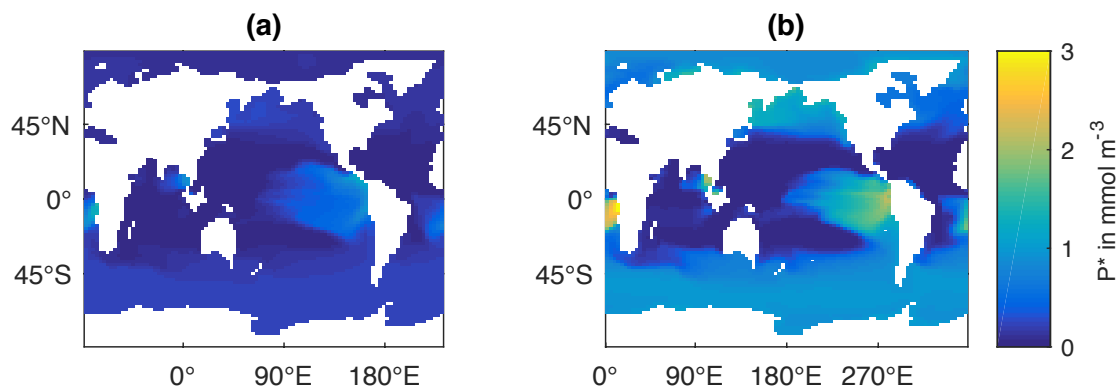

Fig. S2: Spatial distribution of $P^*=P-N/16$ (dissolved P, N) in the surface ocean for (a) the preindustrial case and (b) simulation year 5000 for *Weath0.15*.
